CSS Components Design

In just 2 hours.

Getting started

<https://github.com/lucien-george/css-components-boilerplate>

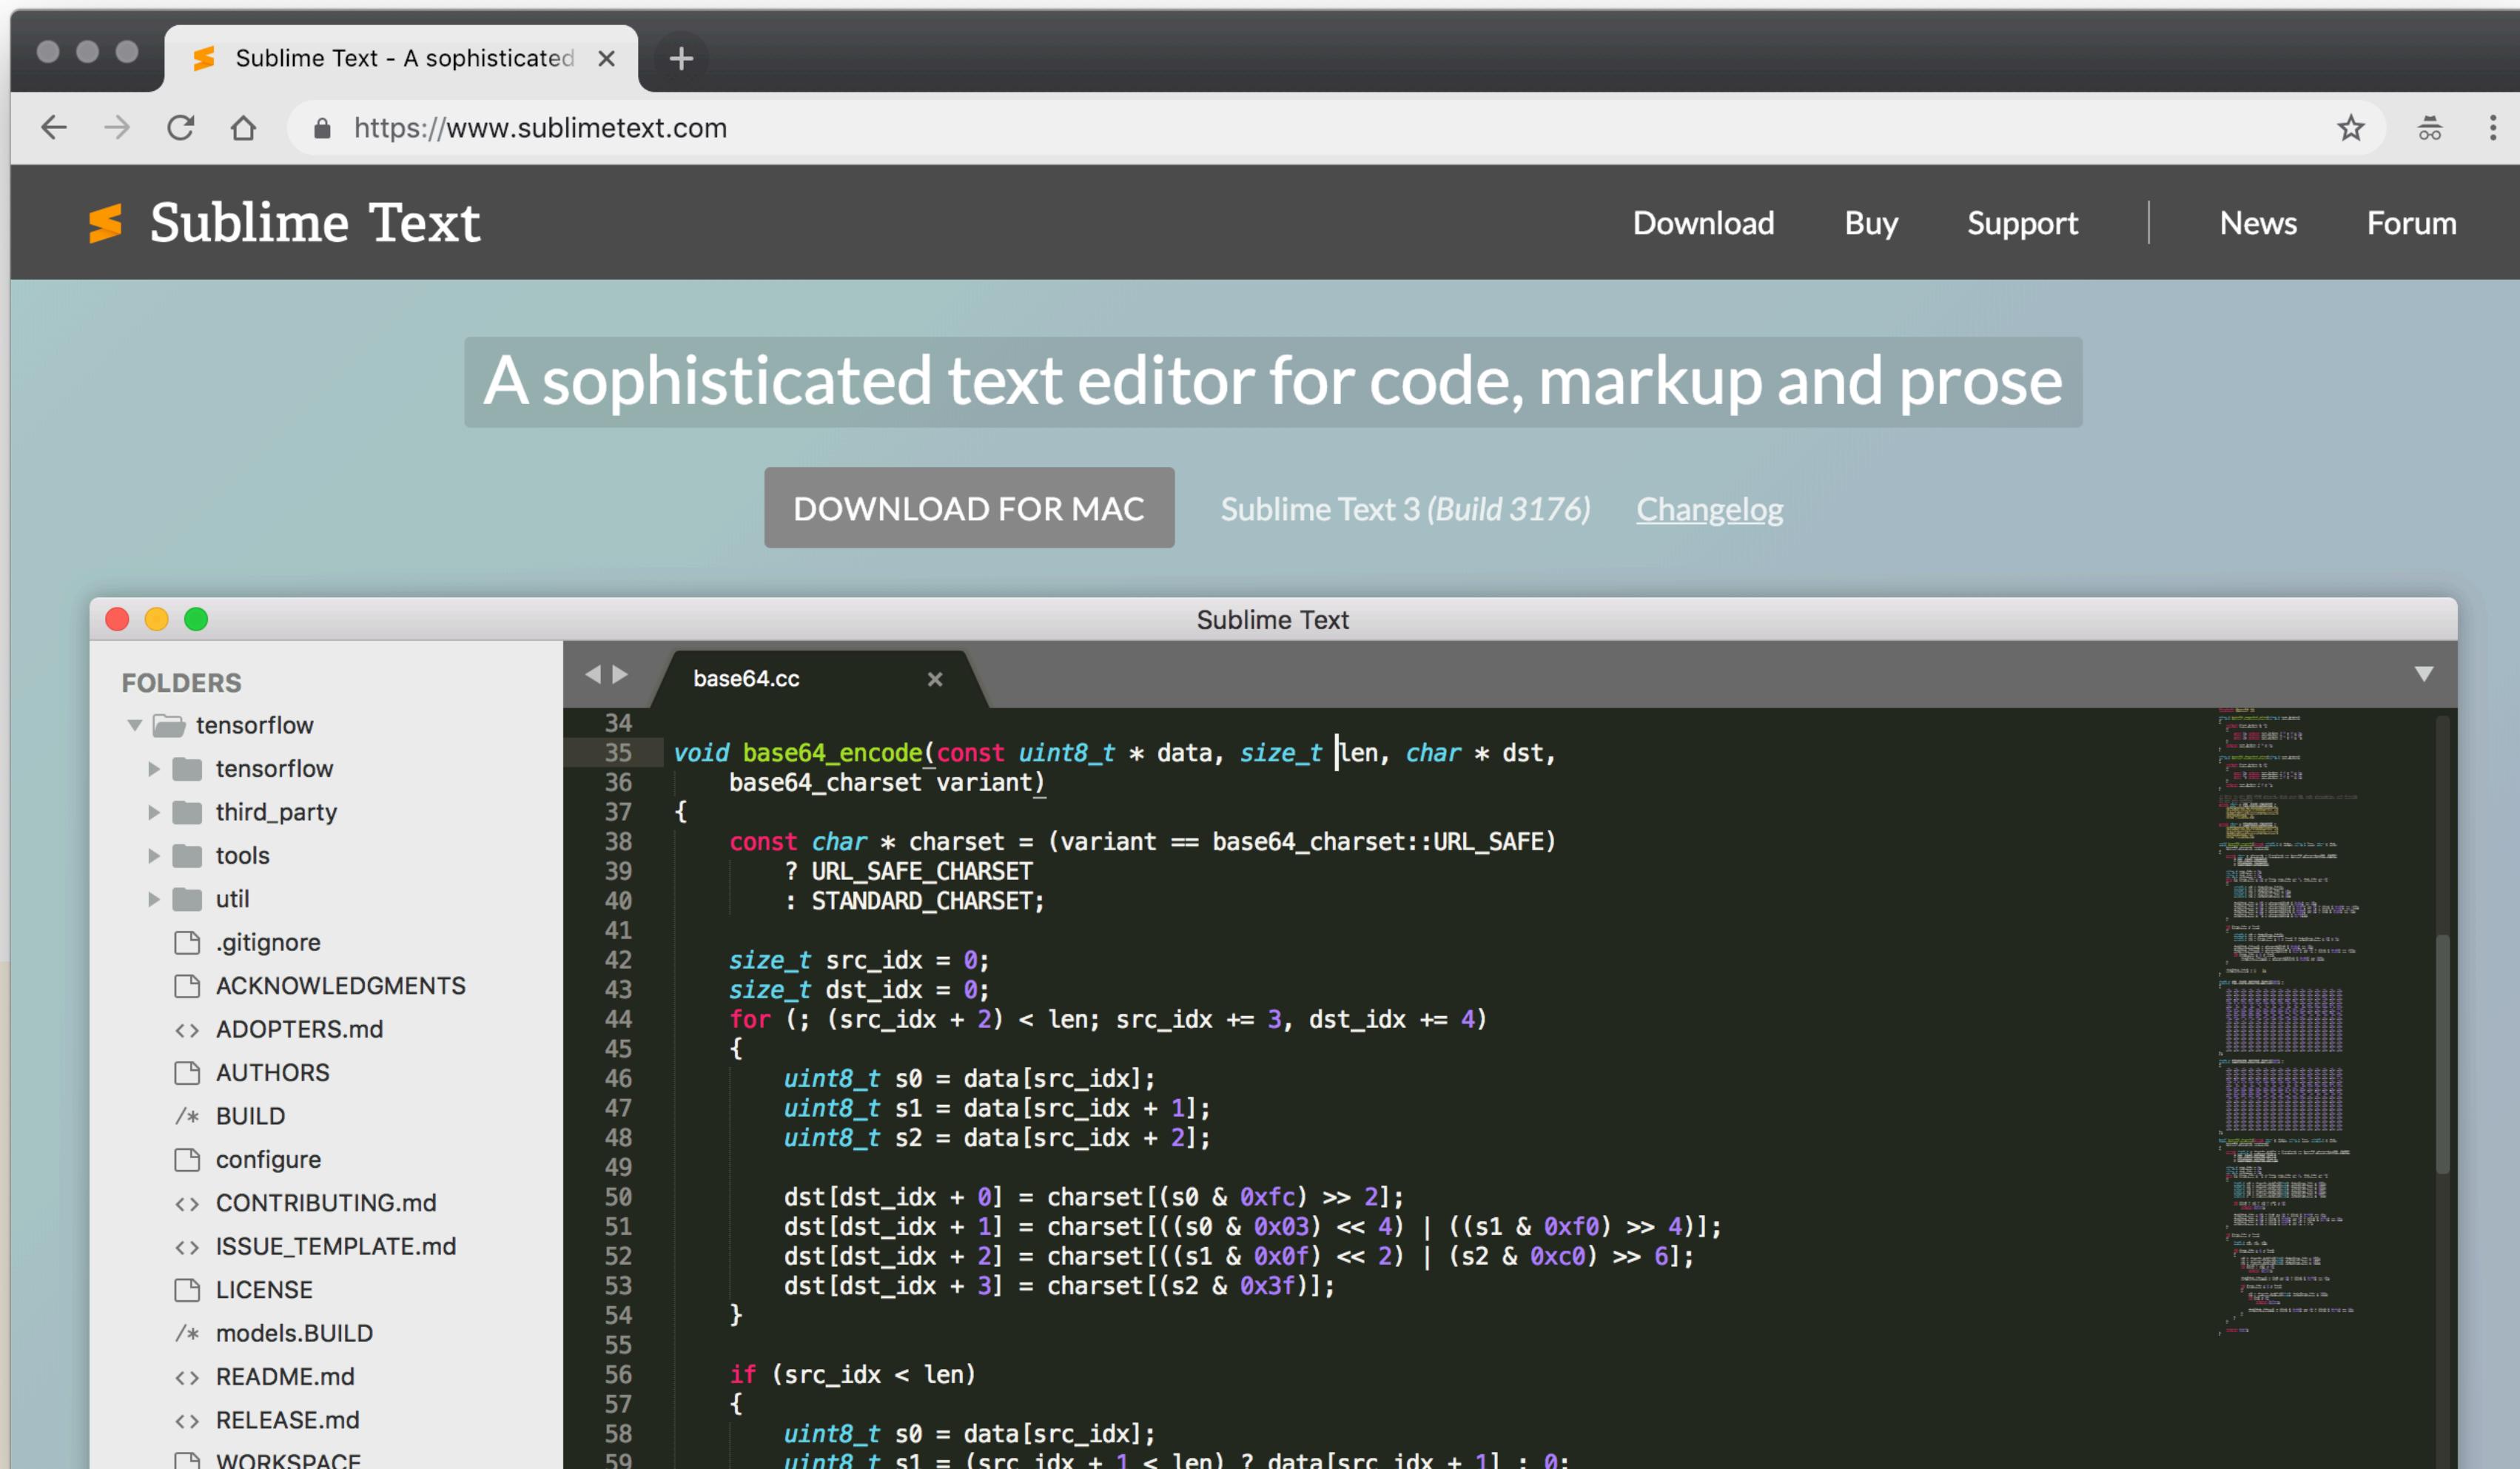

The screenshot shows a GitHub repository page for 'css-components-boilerplate' by 'lucien-george'. The page includes a navigation bar with links for Pull requests, Issues, Marketplace, and Explore. Below the navigation is a search bar and a user profile icon. The main content area displays the repository's name, a summary of activity (15 commits, 2 branches, 0 releases, 1 environment, 1 contributor), and a list of recent commits. The commits are as follows:

- lucien-george added the slides (Latest commit efb651d 11 hours ago)
- css-components code cleanup 11 hours ago
- solution code cleanup 11 hours ago
- README.md Update README.md 11 hours ago
- slides.pdf added the slides 11 hours ago

At the bottom, there is a link to 'README.md'.

Easy CSS Tricks.

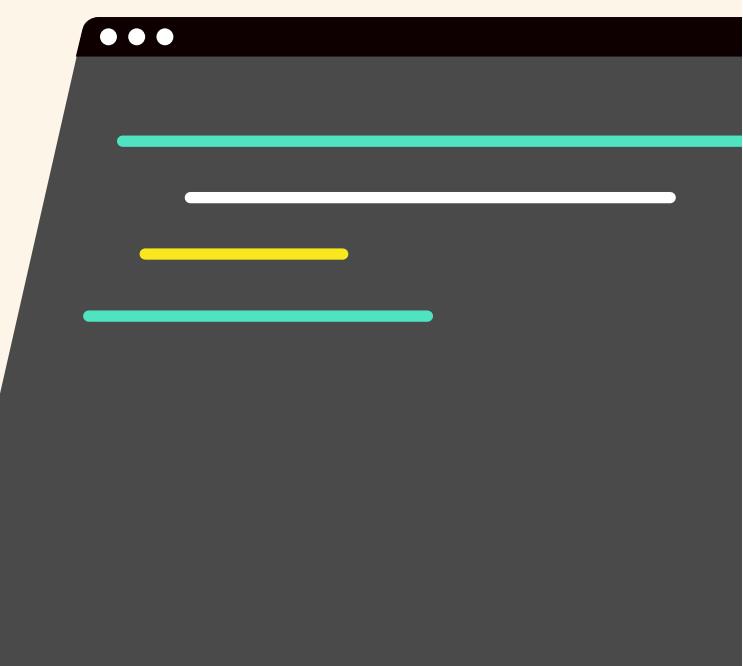

Let's start with some easy components

- Avatars
- Buttons
- Dropdowns

Advanced Patterns.

Let's dive into more advanced styling patterns

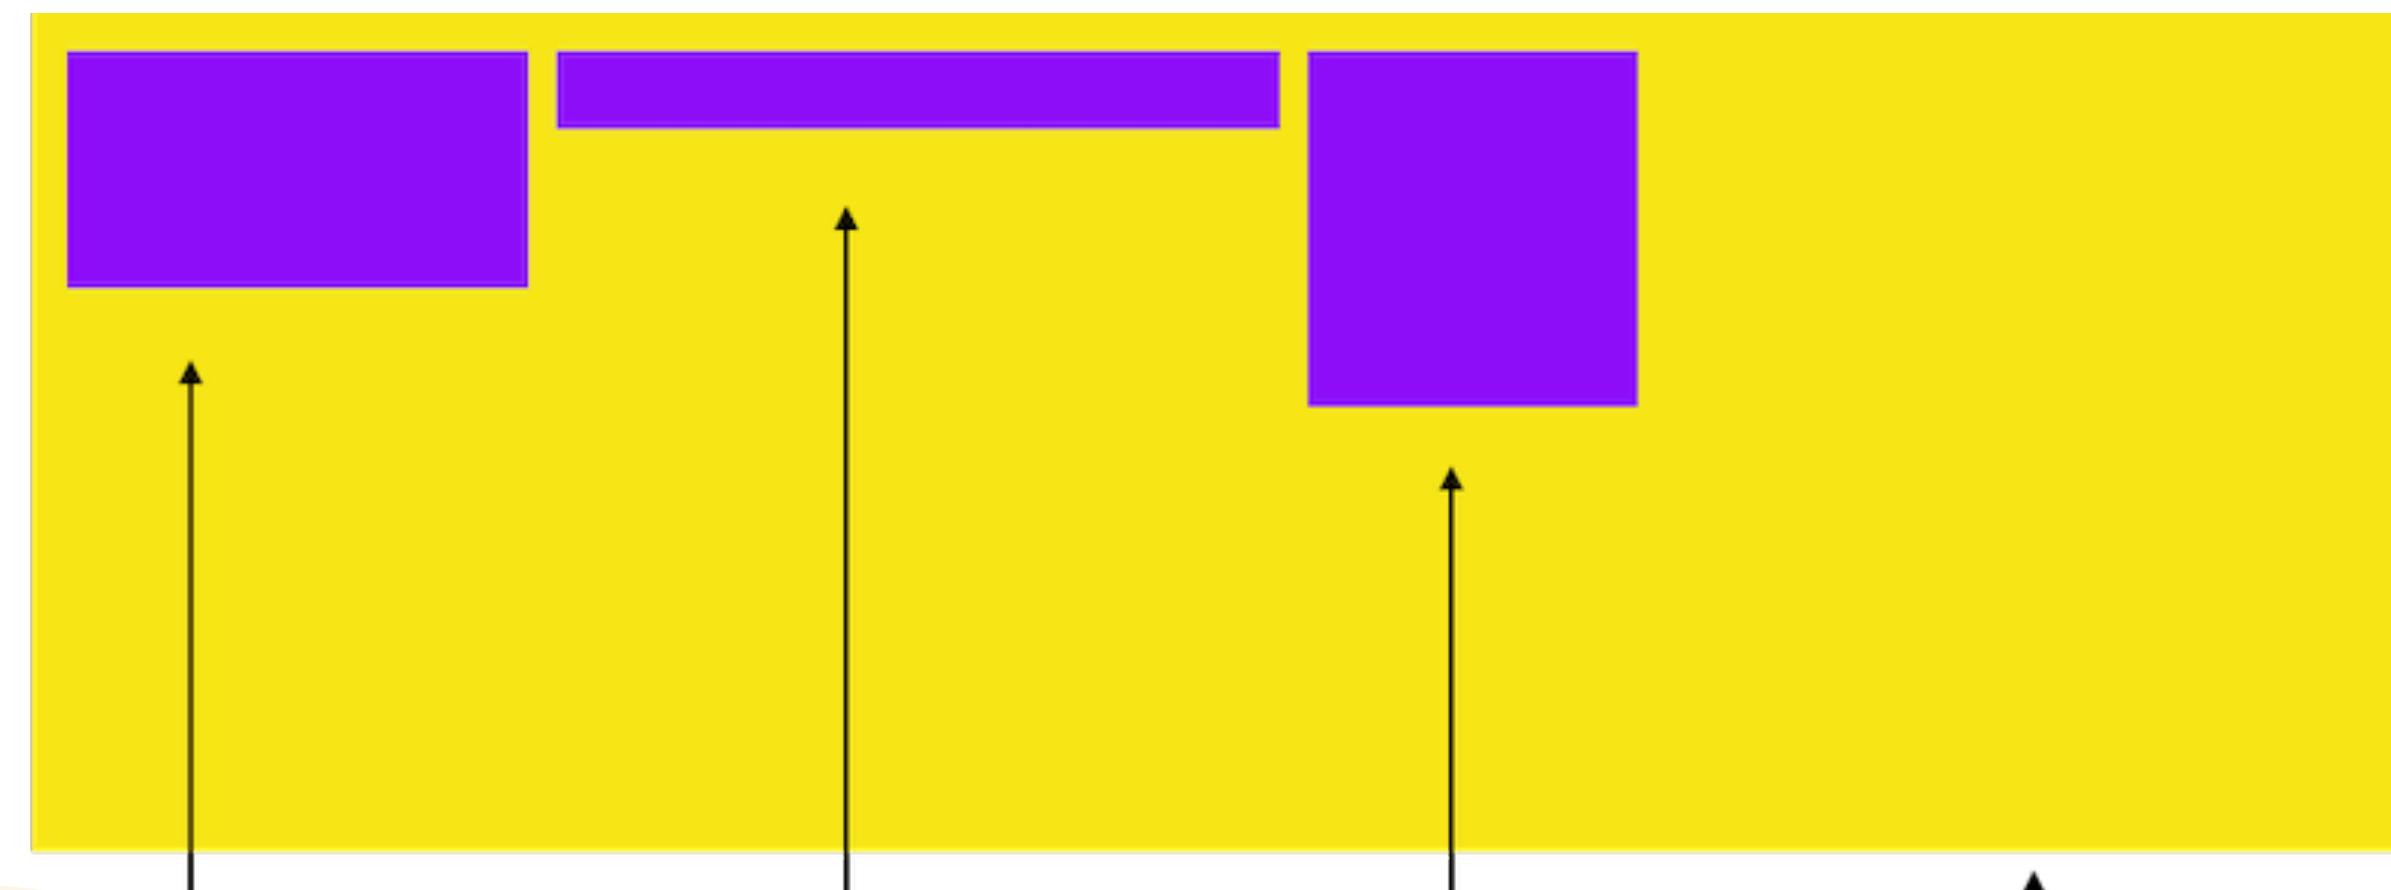

Gradient Filters.

```
.background-image {  
  background-image: linear-gradient(rgba(...),  
  rgba(...)), url('background.png');  
}
```

Using Flexbox.

flex item

flex item

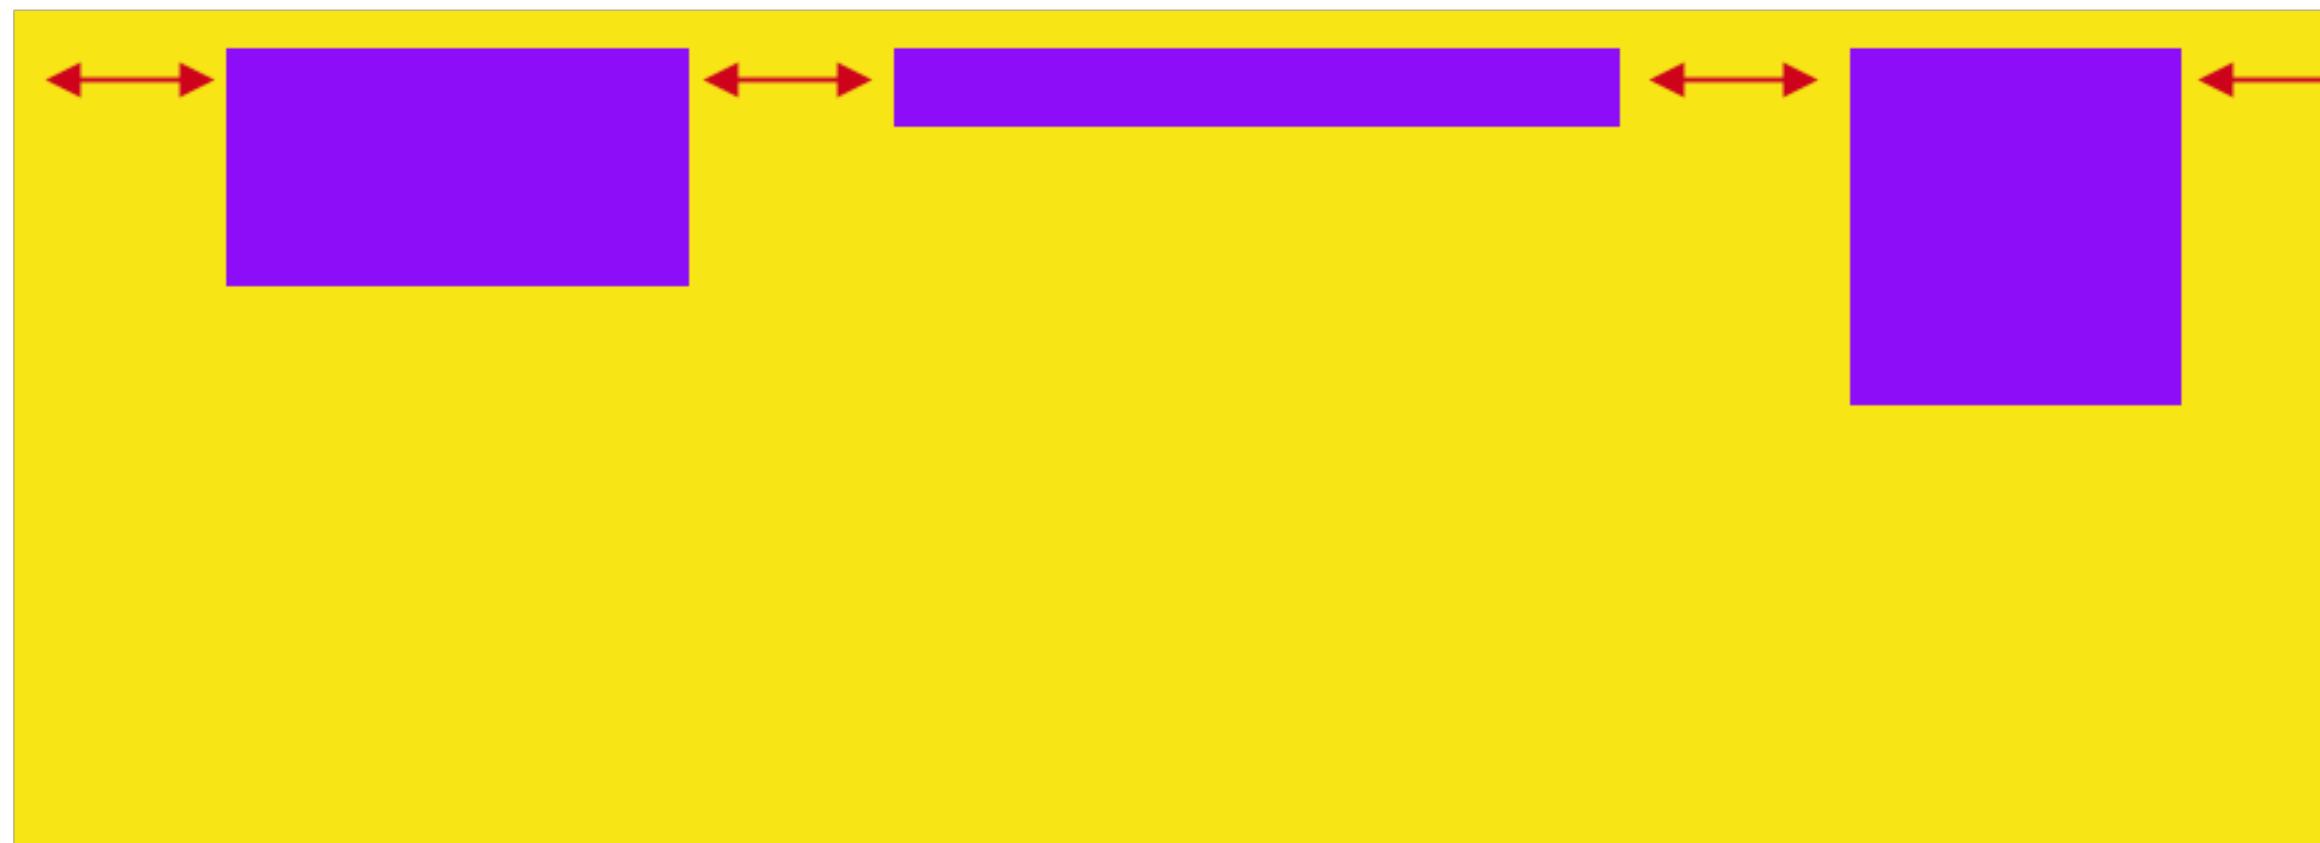

flex item

flex[↑] box

```
.flex {  
  display: flex;  
}
```

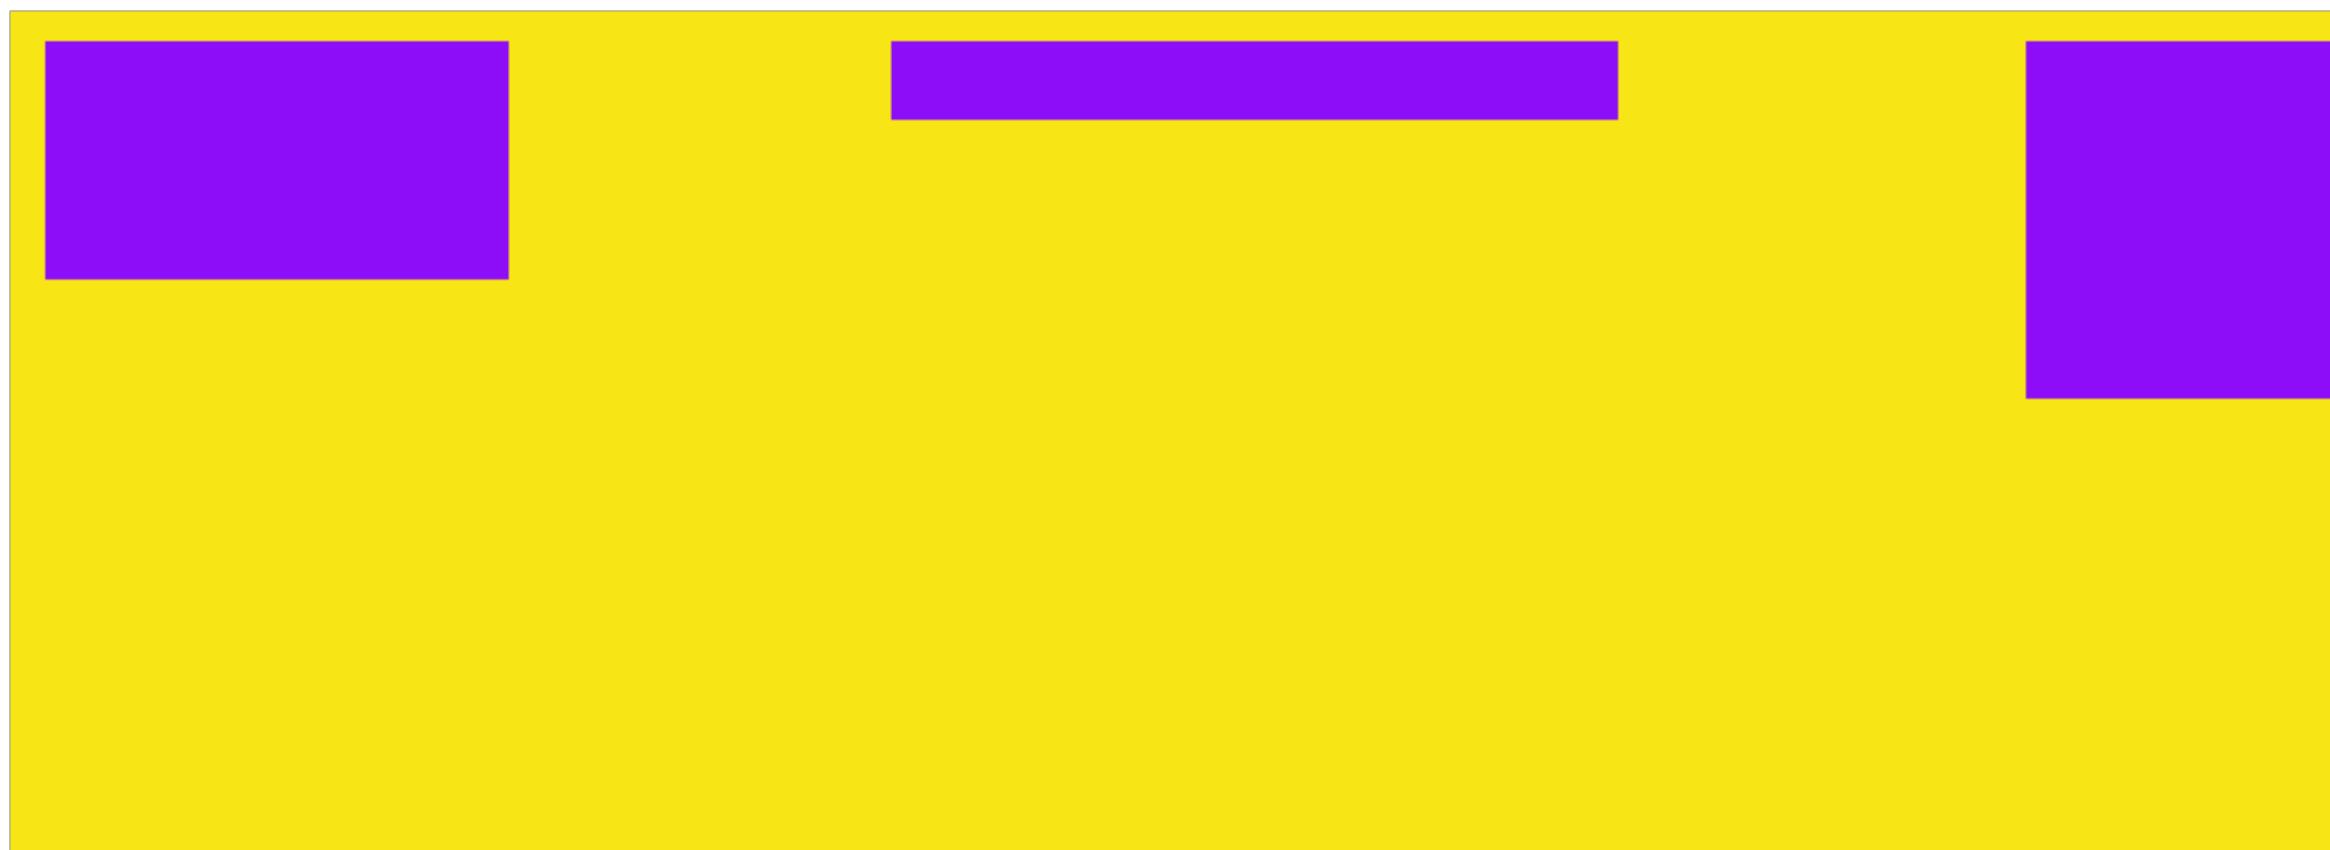

Using Flexbox.

```
.flex {  
  display: flex;  
  justify-content: space-around;  
}
```

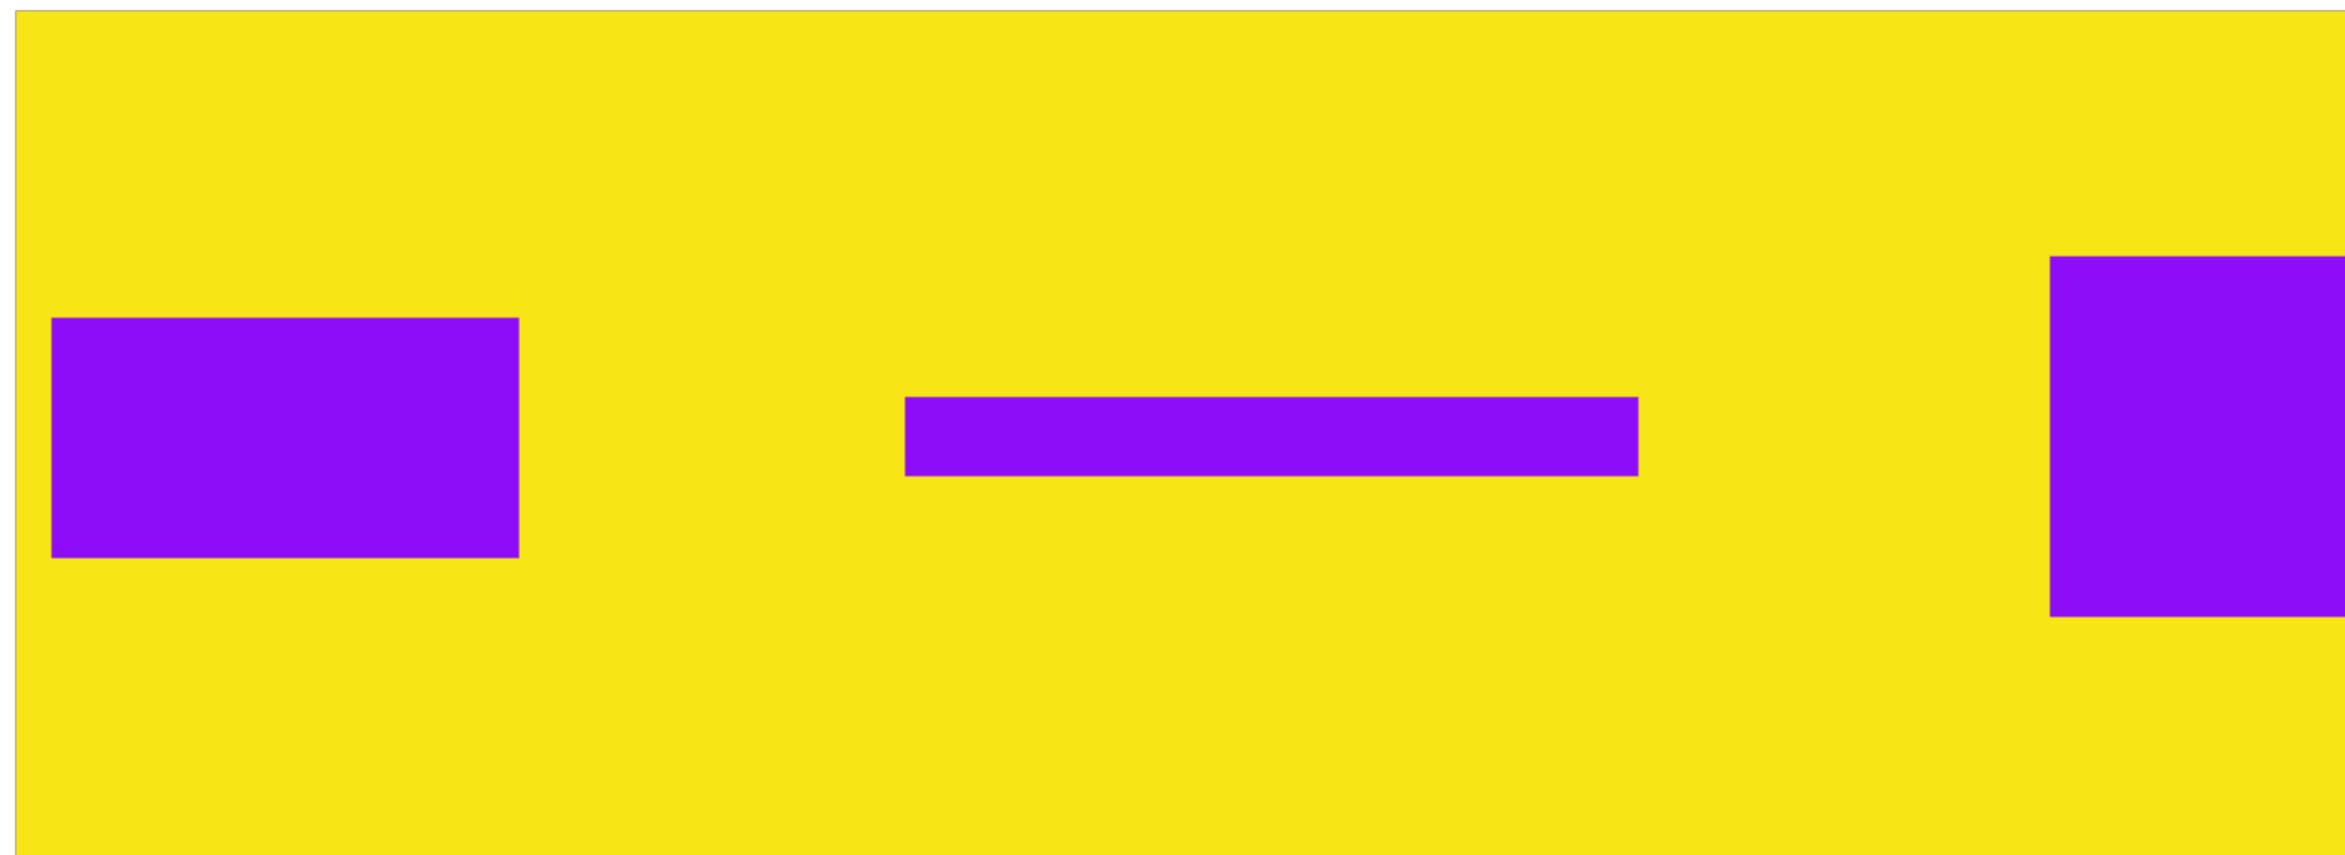

Using Flexbox.

```
.flex {  
  display: flex;  
  justify-content: space-between;  
}
```

Using Flexbox.

```
.flex {  
  display: flex;  
  justify-content: space-between;  
  align-items: center;  
}
```

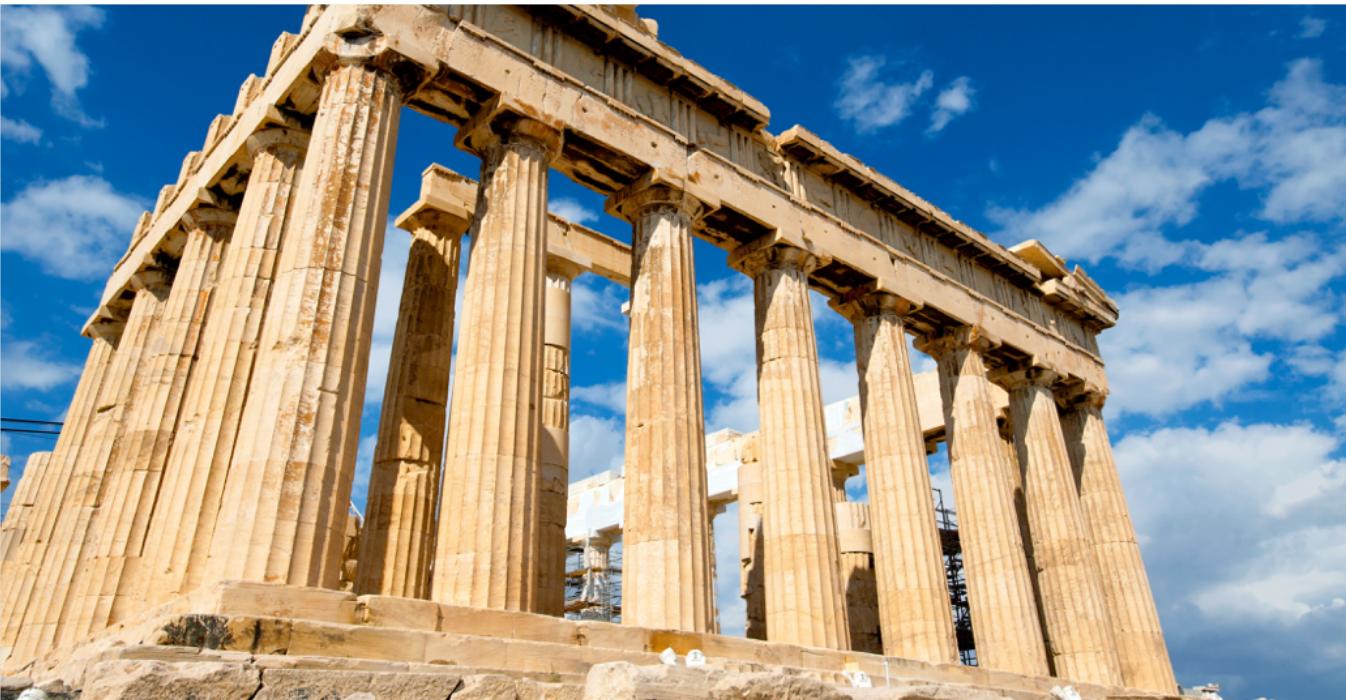

Using Flexbox.

```
.flex-item {  
  flex: 0 0 200px;  
}  
  
.flex-body {  
  flex-grow: 1;  
}
```
